CATFISH PROCESSING

Released: June 22, 2004

UNIVERSITY OF ARKANSAS DIVISION OF AGRICULTURE

10800 Financial Centre Parkway Suite 110 Little Rock, AR 72211 (501) 228-9926 http://www.nass.usda.gov/ar/

Released June 21, 2004, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Catfish Processing* call Mike Barker at 202-720-3243, office hours 7:30 a.m. to 4:00 p.m. ET.

Catfish Processing Down 10 Percent

Farm-raised catfish processed during May 2004 totaled 52.3 million pounds round weight, down 10 percent from May 2003. The average price paid to producers was 72.0 cents per pound for May 2004, down 0.8 cent from last month but 10.2 cents above a year ago.

Net pounds of processed fish sold during May 2004 totaled 24.8 million pounds, down 10 percent from the comparable month in 2003. Total end of the month inventory decreased 1 percent from last month but was up 1 percent from a year ago. Sales of fresh fish, at 9.84 million pounds, were down 15 percent from May 2003 and represented 40 percent of total sales. Frozen fish sales, at 14.9 million pounds, were down 6 percent from a year ago and accounted for the remaining 60 percent of total fish sales. Sales of whole fish represented 16 percent of the total fish sold, fillets accounted for 62 percent, and the remaining 22 percent were mostly steaks, nuggets, and value added products.

The May 2004 average price received by processors for total fresh fish was \$2.28 per pound, an increase of 27 cents from last year. Prices for fresh whole fish were \$1.60 per pound, up 24 cents from last year. Prices for fresh fillets were up 23 cents at \$2.74 per pound. Total frozen fish averaged \$2.30 per pound, up 18 cents from May 2003. Prices for frozen whole fish were up 17 cents at \$2.01, while frozen fillets at \$2.68 per pound were up 26 cents from a year ago.

Freshwater imports of frozen, boneless, catfish fillets for April 2004 totaled 328 thousand pounds, 21 percent above a year ago. Thirty-nine percent of the imports were from China, 34 percent from Vietnam, with the remainder coming from Guyana.

Exports of frozen, boneless catfish fillets reported for April 2004 totaled 28.2 thousand pounds, with over half going to Ecuador. Fresh fillet exports totaled 75.4 thousand pounds, with seventy-two percent going to Canada, and the balance going to the United Kingdom.

Import and export data are compiled by the U.S. Bureau of Census.

^{*} Not published to avoid disclosure of individual operations.

1 Includes all products not already reported including weight of breading and added ingredients.

2 Includes regular, shank, and strip fillets; excludes any breaded products.

Catfish Processing Estimates

Survey Procedures: Survey data for catfish processing are collected from approximately 21 processors. All participating processors must meet the minimum criteria of having a capacity to process at least 2,000 pounds live weight of catfish per 8-hour shift. The survey is conducted entirely by NASS Headquarter's staff in Washington, D.C. NASS field offices, however, are responsible for keeping Headquarters informed of any new processing operations in their state to ensure that the survey coverage is as complete as possible. Processors are contacted either by mail or telephone. Diligent effort is made to ensure that all operations are accounted for in the estimate.

Estimation Procedures: The "Catfish Processing" report refers strictly to farm-raised fish and excludes wild capture fish. Prior to summarization, questionnaires are compared with the previous month's reports for comparable placement of data, reasonable price levels, and reasonable inventory carryover given the sales and processing totals reported. Estimates are made for those processors whose reports are not available in time to be included in the release. These plants are identified by an asterisk on page 5 of this release. Estimates are normally based on the processor's previous report and current conditions. Published totals are a straight summation of the individual reports and estimated data. Price items are weighted by the associated volumes to compute weighted average prices. The published price for total whole fish, however, reflects an adjustment to the round and gutted only price to bring it to an equivalent dressed weight price.

If a plant uses a fiscal accounting system, proration is used to convert reported data to a calendar month basis. Only national level estimates are published due to the limited number of plants involved. Generally, individual items are not published if there are less than three plants reporting, or if any one plant has 60 percent or more of the total.

One unique feature of the "Catfish Processing" report is the listing of cooperating processors by name on each month's release. This feature originally was used to solicit industry cooperation in maintaining coverage, but it has continued because of the processors' overall acceptance of this policy.

Import and export data for frozen catfish fillets, which are compiled by the Department of Commerce, are also included in this report.

Reliability: Catfish processing estimates are based on a census of all known active processors and, therefore, have no sampling variability. However, estimates may be subject to errors such as omissions, duplication, and mistakes in reporting, recording, and processing of the data. These errors are minimized through strict quality controls in the edit and summarization process, and a careful review of all reported data for consistency and reasonableness.

Revision Policy: Revisions may be necessary following a review of late reports received from plants. Revisions of less than 2 percent of the existing published levels of any category will normally not be made.
